4. ПЕРЕЛІК ВИДІВ РОБОТИ З РЕКОМЕНДАЦІЯМИ ЩОДО ЇХ ПРОВЕДЕННЯ

Самостійна робота є невід'ємною складовою вивчення навчальної дисципліни. Вона здійснюється за такими напрямками:

- підготовка теоретичних питань до занять;
- виконання практичних завдань;
- конспектування автентичних підручників;
- виконання індивідуальних завдань (написання творів);
- підготовка до підсумкових модульних робіт;
- підготовка до заліків.

Підготовка теоретичних питань до занять передбачає опрацювання теми заняття. Такі питання могли як розглядати під час практичного заняття, так і повністю вноситися на самостійне опрацювання.

Алгоритм підготовки

- Визначте питання для підготовки (мають бути розглянуті усі питання теми).
- Візьміть у бібліотеці університету (читальному залі або на кафедрі) джерела, зазначені у списку основної літератури. При підборі літератури Ви можете користуватися бібліотечними каталогами (алфавітним, предметним або систематичним).
- Визначте розділи (теми або параграфи), у яких розкрито питання заняття.
- Прочитайте ці розділи.
- Складіть план відповіді на кожне питання.
- Визначте основні поняття, які Ви повинні засвоїти.
- Проаналізуйте, як опрацьований матеріал пов'язаний з іншими питаннями теми.
- Для кращого засвоєння та запам'ятовування матеріалу складіть короткий конспект, схеми, таблиці або графіки по прочитаному матеріалу.
- Визначте проблеми в опрацьованому матеріалі, які Ви недостатньо зрозуміли. З цими питаннями Ви можете звернутися на консультації до викладача.
- Перевірте, як Ви засвоїли опрацьоване питання. Ви можете це зробити, відповівши на тестові питання до теми або розв'язавши практичні завдання.

Конспектування автентичних підручників передбачає поглиблений розгляд окремих питань теми. Для конспектування можуть пропонуватися автентичні підручники британських та американських видань, які всебічно розглядають використання тієї чи іншої часової форми або іншої частини мови.

Алгоритм підготовки

- Прочитайте тему у запропонованому підручнику.
- Складіть план (простий або складний).
- Для кожного пункту плану виділіть основні положення проблеми, яка висвітлюється у підручнику.
- Представте прочитаний текст у вигляді тез або анотації, використовуючи, при потребі, схеми, таблиці, графіки тощо.

- Для самоперевірки перекажіть тему, використовуючи власний конспект.
- Оформіть реферат відповідно до вимог.
- Здайте реферат викладачу у зазначений термін.

Виконання індивідуальних завдань має на меті вироблення умінь, необхідних для практичного застосування навичок, отриманих впродовж вивчення теми.

Алгоритм виконання

- Ознайомтеся з вимогами до написання твору.
- Визначте, чи доводилося вам виконувати подібні завдання.
- Проаналізуйте теоретичний матеріал, необхідний для виконання індивідуального завдання.
- Визначте питання, на які ви не можете дати відповіді самостійно, та зверніться з ними на консультації до викладача.
- Конкретизуйте завдання, які ви маєте вирішити в ході виконання індивідуального завдання.
- Складіть розгорнутий план виконання завдання.
- Виконайте індивідуальне завдання відповідно до плану.
- Проаналізуйте, чи всі поставлені завдання ви виконали.
- Внесіть, при потребі, корективи до виконаного завдання.
- Оформіть завдання відповідно до вимог.
- Здайте завдання викладачу у зазначений термін.

Підготовка до підсумкових модульних робіт (ПМР), екзамену має на меті узагальнення та систематизацію знань з окремого модуля або дисципліни у цілому.

Алгоритм виконання

- Ознайомтеся з переліком питань та завдань до ПМР, заліку або екзамену.
- Підберіть підручники, інструктивно-методичні матеріали або іншу довідкову літературу, необхідну для підготовки (її перелік Ви можете знайти в інструктивно-методичних матеріалах до модуля або курсу).
- Перегляньте зміст кожного питання, користуючись власними конспектами або підручниками.
- Визначте рівень знань з кожного питання.
- Визначте питання, які потребують ретельнішої підготовки (опрацювання додаткової літератури, складання конспектів, схем, розв'язання окремих типів задач тощо). З цією метою зверніться до алгоритму підготовки теоретичних питань до семінарських занять та виконання практичних завдань до лабораторних занять.
- Для самоперевірки перекажіть теоретичні питання або вирішіть практичне завдання.
