Abstract. This is a survey of our recent results concerning divergence-type linear and quasi-linear equations in the complex plane. It contains a number of existence, representation, and regularity theorems for the solutions of fundamental boundary value problems for such equations. The degeneration case of uniform ellipticity is also covered by means of the BMO, VMO, Calderon–Zygmund, Lehto, and Orlicz technics.

The screenshot shows the Springer Link interface for the article. At the top, there is a navigation bar with 'SPRINGER LINK' on the left and 'Log in' on the right. Below this is a search bar with 'Find a journal', 'Publish with us', 'Track your research', and a search icon. The main content area has a dark blue header with the article title 'On divergence-type linear and quasi-linear equations in the complex plane' in white. Below the title, it says 'Published: 19 February 2024' and 'Volume 279, pages 37–66, (2024)'. To the right of the title is a small image of the journal cover. Below the journal cover, there are links for 'Journal of Mathematical Sciences', 'Aims and scope', and 'Submit manuscript'. The authors are listed as 'Vladimir Gutlyanskiĭ, Vladimir Ryazanov, Ruslan Salimov & Evgeny Sevost'yanov'. There is a link for '19 Accesses' and 'Explore all metrics'. The abstract text is displayed below the authors. On the right side, there is a 'Access this article' section with buttons for 'Log in via an institution', 'Buy article PDF 39,95 €', 'Rent this article via DeepDyve', and 'Institutional subscriptions'. At the bottom, there are 'Sections' and 'References' tabs. A small information icon at the bottom left indicates that this is a preview of subscription content.
